

Getting Started with Book Creator

A Short Tutorial
for Teachers

Welcome to Book Creator

This tutorial covers creating books, sharing books, and setting up libraries for your students.

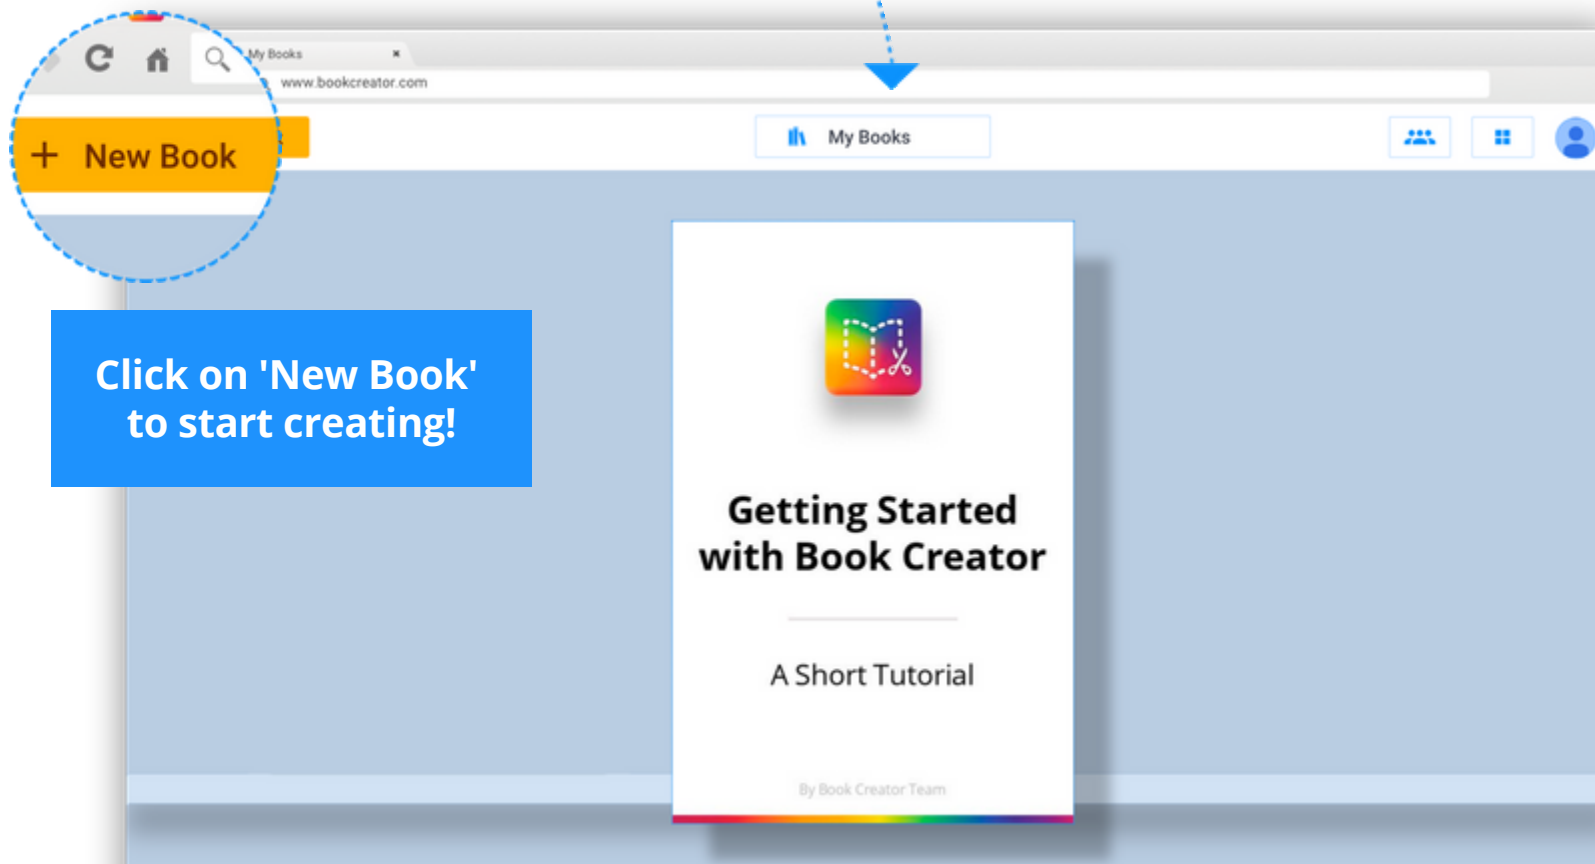

My Books - Your private library

When you log into Book Creator for the first time, you'll see this tutorial book in 'My Books'.

My Books is your **private library** where you can create and store books.

You can also **create libraries** which can be shared and accessed by your students and other teachers.

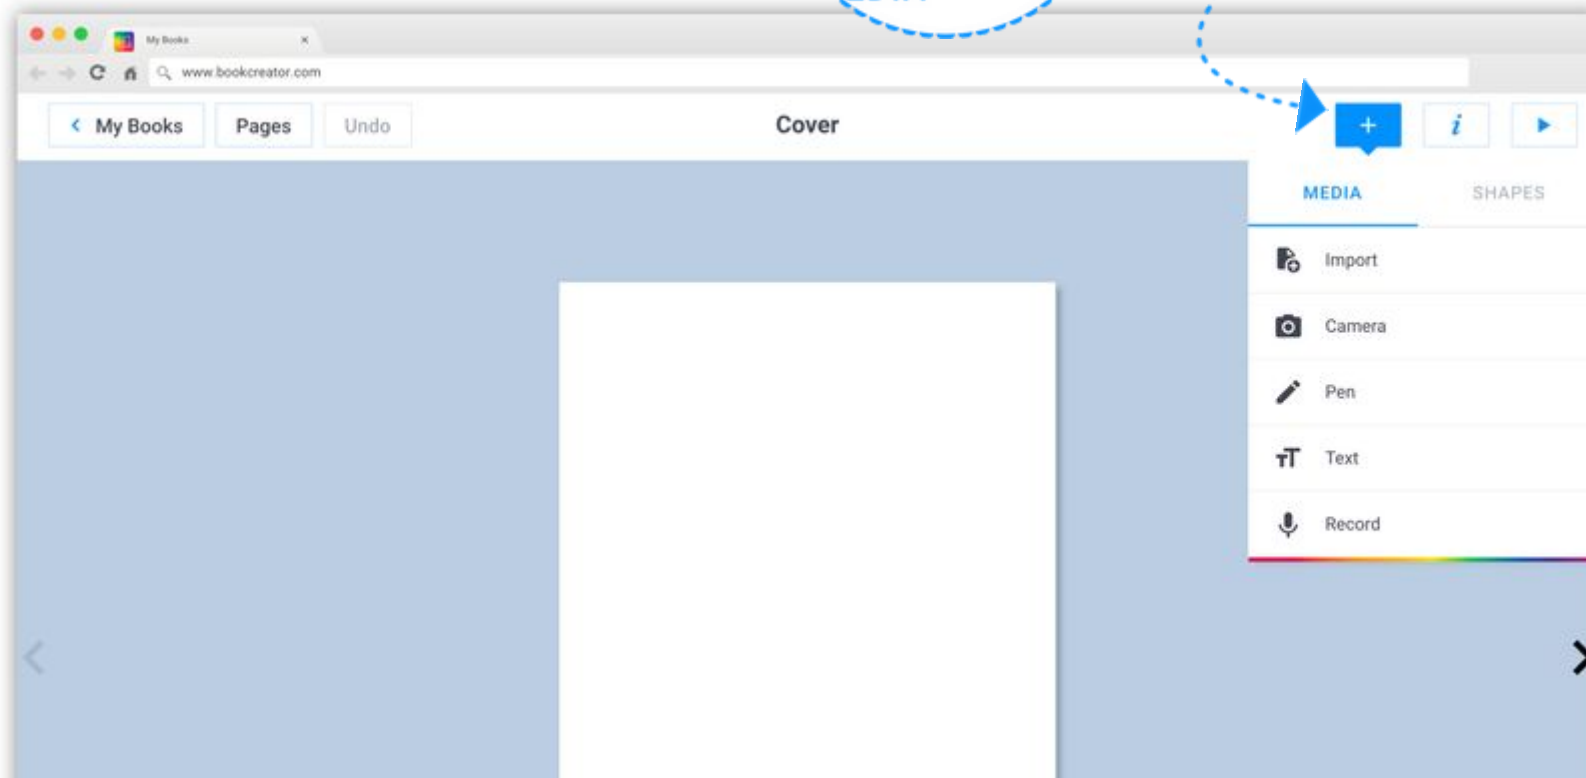

Adding content to a page

Use the '+' button to add different types of content to the pages of your book.

TRY IT NOW

Press the '+' button, and add some text to this page.

Moving content

Adjusting the layout of your page is easy.

You can **move**, **resize** and **rotate** your content by using your mouse or finger.

TRY IT NOW

Try **moving**, **resizing** and **rotating** the icon below.

Move content around the page by selecting and dragging it with your mouse or finger

Resize content by dragging the blue dots in the corners

Rotate content by dragging the green dot

Styling content with the Inspector

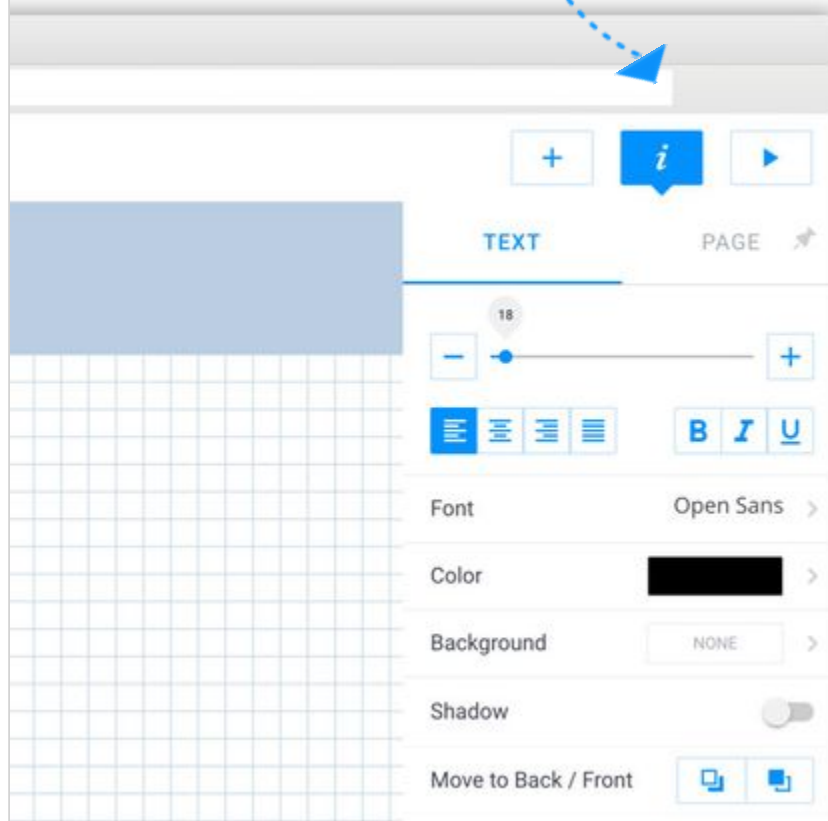

With the 'i' button you can inspect content on the page and style it.

TRY IT NOW

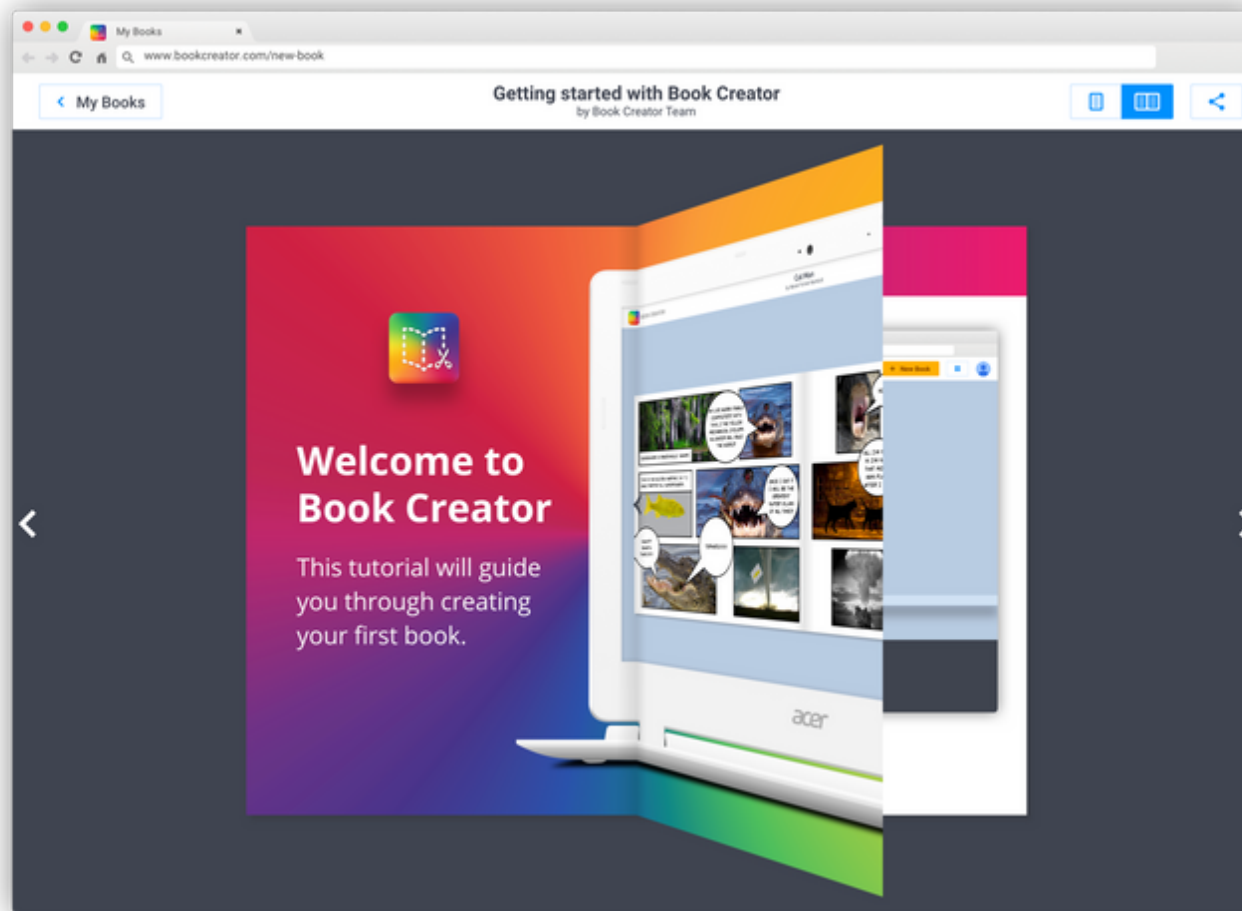

Click on the text below and style it.

Make me purple!

Reading your book

You can read your book at any time by pressing the play button.
This will open your book in the web reader, where you'll be able to flip through the pages.

Publish and share your book

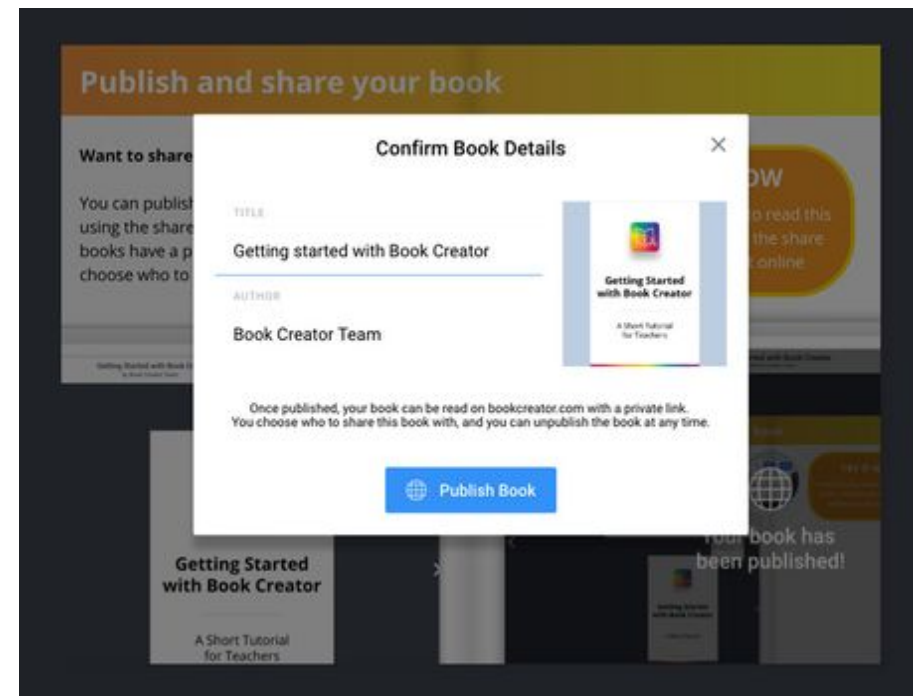

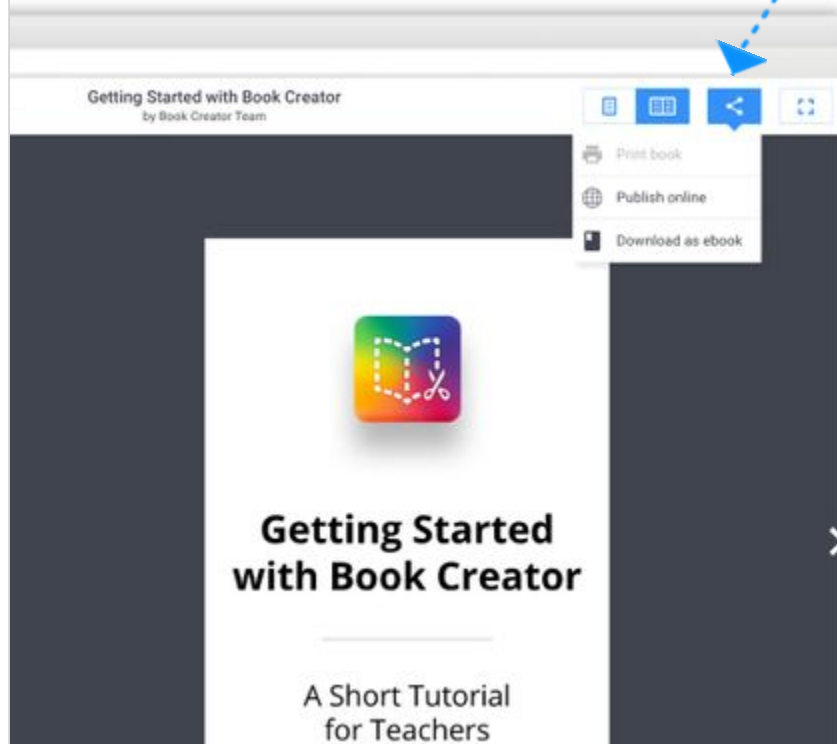

Want to share your book?

You can publish your book online using the share button. Published books have a private link and you choose who to share it with.

TRY IT NOW

Press the play button to read this book, and then press the share button to publish it online

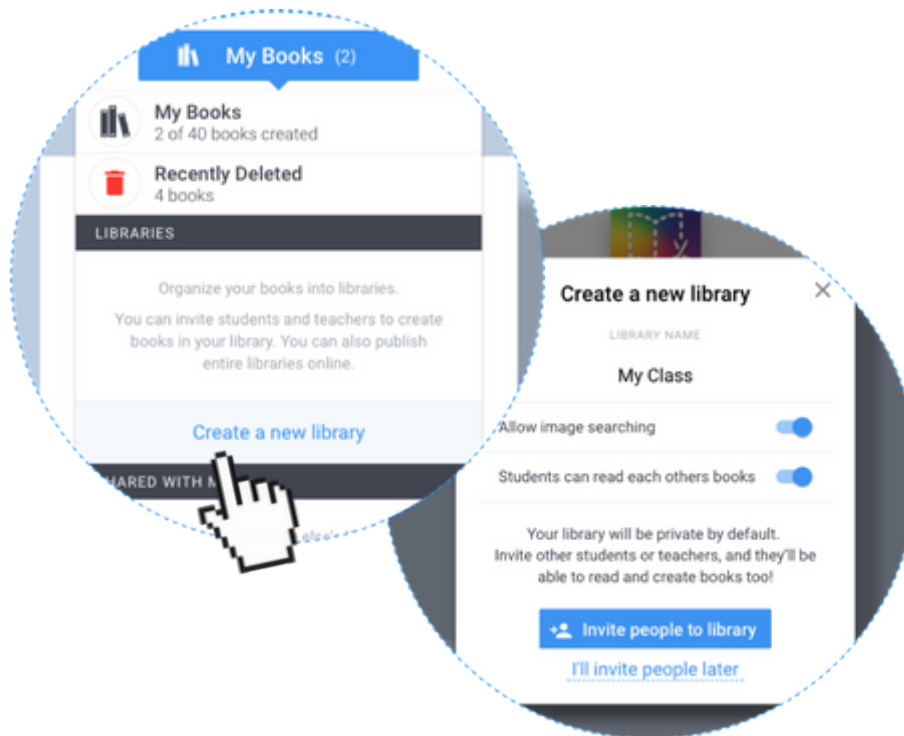

Working with students

To get started create a library

The free plan lets you have 1 active library, which can store 40 student books.

If you need more books there are upgrade options for every budget.

Invite students to your library

Your students join your library using a code, and their books automatically appear for you to read.

Students can only create books inside a teacher's library.

You're all set!

That's all you need to know to get started with your class.
